## TECHNICAL SKILLS

JavaScript, SQL, Python, Shell, Perl

---

## PROJECTS

### Local Reviews Web Application

[Live](#) | [GitHub Repo](#)

An interactive website for discovering and rating local businesses and attractions.

- Created a full-stack web platform using JavaScript, Python, and CSS to allow users to post and view local business reviews through an interactive interface.
- Added user ratings, reviews, and search functionality to make discovering local businesses simple and intuitive.

### Rental Property Web Application

[Live](#) | [GitHub Repo](#)

A platform for managing property listings and booking short-term stays.

- Developed a full-stack rental platform with Shell, Perl, and JavaScript to manage property listings, bookings, and availability.
- Added features such as ratings, availability dates, and booking details to help both users and hosts manage bookings more effectively.

## WORK EXPERIENCE

### Data Entry Specialist

Jul 2018 – Present

Pierson Investments, Houston, TX

Pierson Investments is a small, family-run real estate company that acquires and rents residential properties. I'm responsible for entering and maintaining property data, tracking rental information, and supporting day-to-day operations.

- Enter and keep property information up to date, including purchase details, rental rates, and lease terms.
  - Create reports showing rental activity, occupancy, and property performance.
  - Help prepare and review data for new property acquisitions.
-
